This table summarizes the Computer Engineering curriculum in the form of the flowchart. Each box (as shown in the figure below) in the flowchart lists the course number, name, number of credit hours, and University Core Requirements (UCORE) that the course meets. Solid lines flowing into each box represent prerequisites, dashed line indicates co-requisites.

*If either EE 331 or EE 341 is taken as an engineering science elective, it cannot also count as a technical elective.

**Reference document only, the official 4-year plan is in the University Catalog
